Founded in 2010, Survontrol Agro is one of the major grain romanian traders. A company with a 100% romanian private capital.

We are in the top of the largest romanian trading companies that distribute agricultural raw materials and inputs in Europe and Asia.

The logistic center is located in many multifunctional zonal centers, with more than 20.000sqm wearhouses. The headquarters are located in one of the largest ports in Romania, in Galati county. With all the facilities we have in Galati port, since 2010 we sold on the sea over 1 million tonnes grains to our partners.

Our professional team is strongly specialized and motivated by all the achievements obtained by the company in 8 years. We also have professional equipment for quality measurement of goods, and loading vessels.

Business plan for 2019

Our next objective for 2019 is represented by building another grain dice, for loading large ships and barges and also a silo with a capacity of 100.000to in Chiscani area, Braila county.

This masterplan will represent the first private port in Romania, and by its geographic position will help collecting all the agricultural raw materials for all the countries that do not have directly acces to the sea.

SURVCONTROL AGRO

- we sell all type of grains(wheat, maize, sunflower seeds, barley, rapeseed)
- we sell inputs all over Romania to farmers and to distributors
- we own secure storages in many romanian counties
- we ensure road transport all over the country
- we ensure the best quality and attractive prices.

"..the difference between knowing the way and walk on it, thought us that the evolution in based on ambition and fairness.."

Gutium Daniel

-founder of Survcontrol Agro-
